

Why “10 Proofs” Are Important And Needed

If people REALLY thought and believed that the Creator of us, this life and the universe gave us this book called the Bible, here is how things would be different:

- There would be a total fascination with this book above everything else in this life (as there has been in my life for the past 25 years)
- The highest interest in this life would be to study this book
- The #1 focus and concern in this life would be to obey all that is in this book
- If even just a majority of adults in the U.S. (or any nation) believed that:
 - It would be taught in schools
 - They would vote in laws for the mainstream to be cleansed from sin
 - People would *stand* for what’s in the Bible and not *fall* for anything else

Come to think of it, the U.S. used to be a lot like what I described above ... for sure when I was growing up in the ‘50s, but also quotes by the founding fathers of this country and how the government and culture were run would say that holiness was even more popular in the earlier years of this nation. The laws of this country and its leaders were much more reverent of and in harmony with the standards in the Bible.

And what is the result (*scientifically* speaking) of having or not having a belief in the Bible and living it out? Well on a national level that can be *quantified* by comparing the social *statistics* of times when the Bible and holiness were more popular to times when sin was more legally tolerated. (See the chart of those statistics in my book *The Plague Of Liberalism* – www.thePlagueOfLiberalism.com). Another way to see the difference is to compare the healthiness and beauty of the entertainment from different eras. (Also see the comparison I spelled out in *The Plague Of Liberalism*).

Therefore it is important to establish that THE Truth says that there is a God and the Bible is a direct communication from Him to us. Now either that is true or it isn’t. That’s why science (which is the best way to investigate reality) must be employed to establish whether it is or isn’t. And the science of logic says that “There is ONLY ONE truth”.

So my live presentation and my books are the result of spending the last 40 years investigating what the one truth is about the mysteries of life and the universe and how much humans can know about those mysteries and how much can be proven. This is all grounded in my education and training in science and engineering. I also have an extensive history in psychology, the arts and theology. Plus I tried 19 other approaches to lifestyle, truth, problem solving and personal growth before finally concluding 25 years ago that the Bible is the only perfect document on the planet of truth about the mysteries of life and how it should optimally be operated. Now I’m able to scientifically prove that point, and that is what my life is devoted to passing on ... not only in service to our Creator, but also to make the lives of people better ... now and for eternity.
